

Strengthening Health Resilience in TB program in Nepal

Introduction

'Strengthening Health Resilience in TB program in Nepal' is the project funded by Global Fund through UNDP Nepal that aims to enhance tuberculosis (TB) prevention, diagnosis, and treatment—especially among high-risk and vulnerable groups in Nepal.

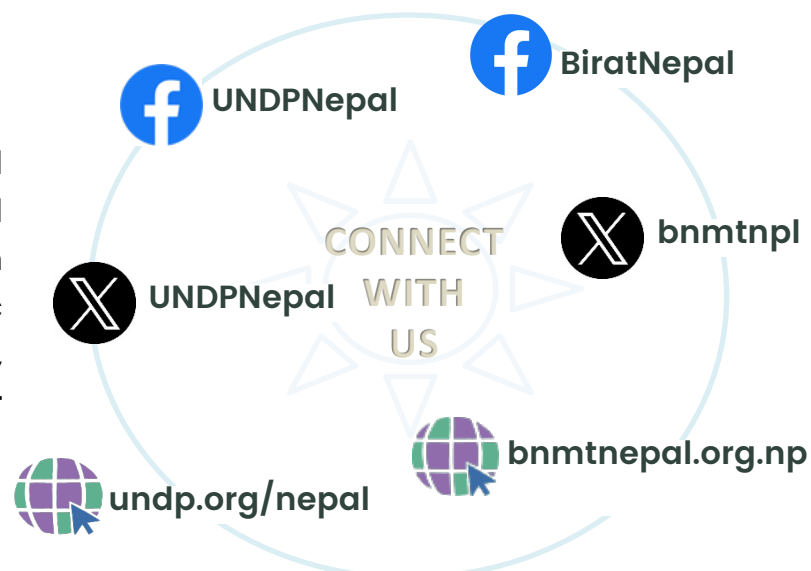

Through evidence-based approaches and leveraging community engagement, the project will address service delivery barriers, boost case detection, expand coverage, improve diagnostics, and support national TB control goals in Nepal. The project period is 1 April 2025 to 31 September 2027.

Partners

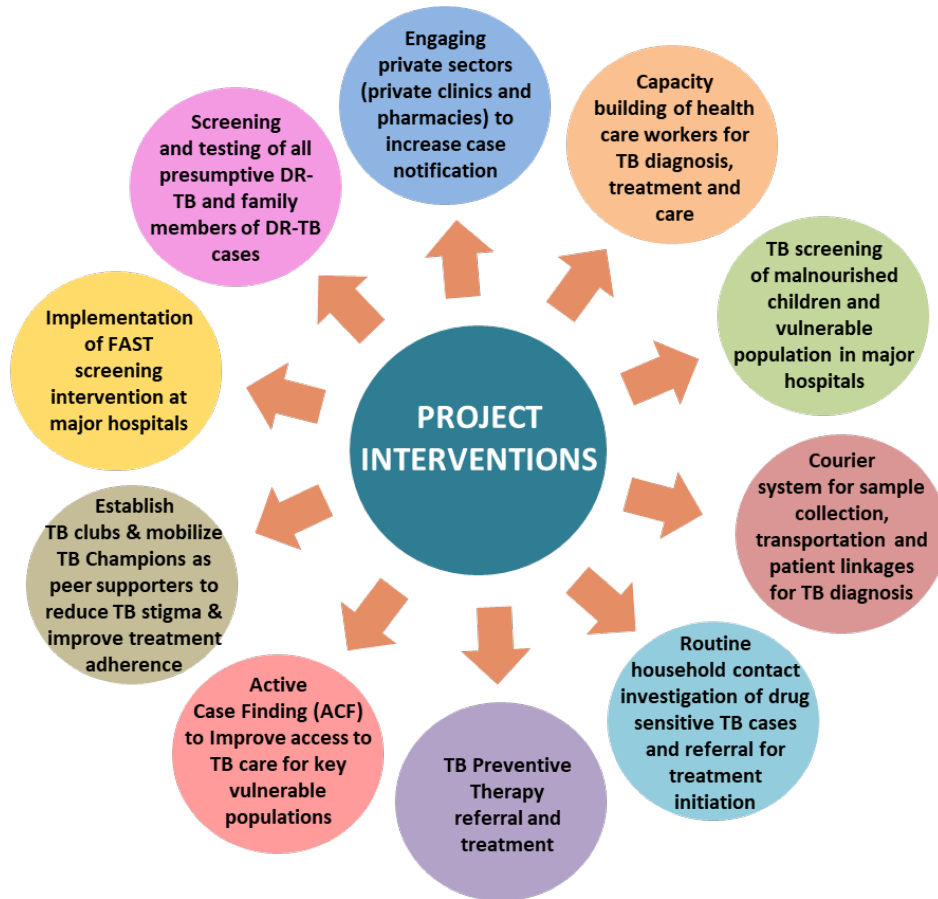

Ministry of Health and Population, National Tuberculosis Control Center, Provincial Health Directorate, Provincial Public Health Laboratory, Provincial Health Logistic Management Centre, Health offices, municipalities and TB partner organizations

Objectives

- Strengthen TB case detection and notification
- Improve treatment outcomes and adherence
- Expand access to rapid diagnostic tools
- Promote TB preventive treatment
- Address equity barriers to TB services
- Engage the private sector
- Reduce human rights and gender-related barriers to access TB care
- Enhance community systems
- Support the National References Laboratories (NRL) and Provincial Laboratories (PHL's)
